You'll need scissors and clear tape
to make '**Karbo**' the elephant.

1. *Cut* out elephant.
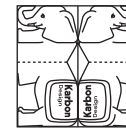

2. *Fold* in half and *cut* out the 'triangle' area.

**3**. Open out and make the first *'Fold¹'* forward, away from you.

4. Make the second *'Fold²'* back, towards you. Do not fold both pieces.

5. *Push* the head back to the body and *fold* in half.

6. *Tape* rear legs together along with the trunk. Stand elephant up.
